

# One small step toward a brighter future

for the Rehabilitation Center  
at Hadassah Hospital Mount Scopus

## Definition of the Rehabilitation Center

- Rehabilitation Center for IDF Disabled Soldiers and Veterans with spinal cord and multiple traumas.
- The rehabilitation will provide more services overall at the aging Mount Scopus Campus of Hadassah Medical Center.
- The rehabilitation will incorporate treatments with advanced technology and equipment and long term follow up.

## The center will include:

- Evaluation will include unique and multi-disciplinary evaluation for the construction of optimal treatment plans. This evaluation will be based on the state-of-the-art technologies supplying quantitative and precise biomechanical data.
- The treatment methods will be applied via robotic, virtual reality, self-training systems and highly motivating games, etc.
- Cognitive rehabilitation process including long term, patient-specific psycho-cognitive treatment.
- Occupational therapy center designed to adapt the home environment, vehicle, workplace and more to the patient's special needs.

## The center's objectives

- Providing a comprehensive and patient-specific evaluation and treatment facility for disabled soldiers and veterans with spinal cord and multiple trauma injuries.
- Establish a well-coordinated multidisciplinary rehabilitation center, which combines all required medical services available in Hadassah. This will place the disabled at the heart of the care system so that all available services are a one stop shop.
